## SUMMARY

Aspiring web developer proficient in both front-end and back-end development. Skilled in building responsive and user-friendly websites and web applications.

## WORK EXPERIENCE

**Freelance Web Developer** Live

Tech Stack: React, Tailwind CSS, EmailJS, SMTP, Live Hosting, ExpressJS,

### July 2024

- Developed a fully responsive website from scratch using React and Tailwind CSS.
- Collaborated with clients to understand their requirements and delivered a solution that met their needs.
- Utilized responsive design principles to ensure the site works well on various devices.
- Integrated **EmailJS** for handling email notifications and form submissions.
- Configured and managed an **SMTP server** for sending transactional emails.
- Deployed the website and managed hosting, including setting up DNS records and connecting name servers.

## TECHNICAL SKILLS

- ❖ **Frontend:** HTML, CSS, Javascript, React Js, Redux
- ❖ **Backend:** Node Js, Express Js
- ❖ **Database:** MongoDB
- ❖ **Other:** C, C++

## PROJECTS

**Portfolio** Live

Multipage personal portfolio

Github

Tech Stack: React JS, Node Js, Express Js, Vercel

### May 2024 - Present

- Created a professional platform that effectively highlights personal projects, technical skills, and professional qualifications.
- Utilized React-Bootstrap and custom CSS for a visually appealing and easily customizable design.
- Ensured full responsiveness across devices for an optimal user experience.

**Real-Estate Website** Live

Real estate MarketPlace

Github

Tech Stack: React Js, Node Js, MongoDB, Express Js, Redux, JWT, Firebase

### Apr 2024

- Developed a full-featured real estate website using the MERN stack implemented with secure user authentication and authorization using JSON Web Tokens (JWT).
- Utilized Redux for efficient state management and enhanced user experience.
- Enabled property listings, user profiles, advanced search filters, and real-time updates.

**Food-Ordering Website** Live

Stack: React Js, Next Js 14, MongoDB, Tailwind CSS, Next Auth, Typescript, Firebase

Github

### Feb 2024 - Mar 2024

- Developed a dynamic food ordering website using Next.js and React.js
- Utilized MongoDB for efficient data storage and Firebase for real-time database features and notifications.
- Implemented user-friendly interfaces for browsing menus, placing orders, and tracking order status in real-time.
