## SUMMARY

Aspiring web developer proficient in both front-end and back-end development. Skilled in building responsive and user-friendly websites and web applications.

## TECHNICAL SKILLS

- ❖ **Frontend: HTML, CSS, Javascript, React Js, Redux**
- ❖ **Backend: Node Js, Express Js**
- ❖ **Database: MongoDB**
- ❖ **Other: C, C++**

## PROJECTS

### Freelance Website Project
*Live*
**Custom Website Development**
Github
**Tech Stack: React, Tailwind CSS, EmailJS, SMTP, Live Hosting**

**July 2024 - Present**
- Developed a fully responsive website from scratch using React and Tailwind CSS.
- Collaborated with clients to understand their requirements and delivered a solution that met their needs.
- Utilized responsive design principles to ensure the site works well on various devices.
- Integrated **EmailJS** for handling email notifications and form submissions.
- Configured and managed an **SMTP serve**r for sending transactional emails.
- Deployed the website and managed hosting, including setting up DNS records and connecting name servers.

### Real-Estate Website
*Live*
**Real estate MarketPlace**
Github
**Tech Stack: React Js, Node Js, MongoDB, Express Js, Redux, JWT, Firebase**

**Apr 2024**
- Developed a full-featured real estate website using the MERN stack implemented with secure user authentication and authorization using JSON Web Tokens (JWT).
- Utilized Redux for efficient state management and enhanced user experience.
- Enabled property listings, user profiles, advanced search filters, and real-time updates.

### Portfolio
*Live*
**Multipage personal portfolio**
Github
**Tech Stack: React JS, Node Js, Express Js, Vercel**

**May 2024 - Present**
- Created a professional platform that effectively highlights personal projects, technical skills, and professional qualifications.
- Utilized React-Bootstrap and custom CSS for a visually appealing and easily customizable design.
- Ensured full responsiveness across devices for an optimal user experience.

### Food-Ordering Website
*Live*
**Stack: React Js, Next Js 14, MongoDB, Tailwind CSS, Next Auth, Typescript, Firebase**
Github

**Feb 2024 - Mar 2024**
- Developed a dynamic food ordering website using Next.js and React.js
- Utilized MongoDB for efficient data storage and Firebase for real-time database features and notifications.
- Implemented user-friendly interfaces for browsing menus, placing orders, and tracking order status in real-time.
